

Mercury Testing

Martin County Health Department staff will be participating in the following events, collecting hair samples and providing information for a public health study on mercury.

Volunteer participants must be women, between the ages of 18 and 49 who have lived in Martin County for at least 1 year. Participants will be notified by mail with test results.

For more information about additional testing locations throughout county, please contact Serina Jones, Environmental Health Specialist, (772) 221-4090
