## **Back to School Immunization Clinics**

The Martin County Health Department is hosting two back to school immunization clinics this month.

Students entering kindergarten are required to have all shots up to date as well as receive a second dose of the Varicella (chickenpox) vaccine, if they have not already had the illness. Students entering seventh grade are required to receive the T-dap (Tetanus, Diphtheria, Pertussis) booster.

Immunizations are free for students 18 years old and younger and are also available by appointment. Please call (772) 221-4000 ext. 2249 for more information.
