

The School Health Program was established by Florida Statute and provides health education, training, and support to school staff, students, and families.

2009-10 - School Health Screenings: 1st & 3rd grade

6,455 Vision • 5,194 Hearing • 3,809 BMI • 1,100 Dental

A Weighty Issue

Recent body mass index (BMI) screenings show that about one third of kids in Martin County are overweight or obese. Overweight kids become overweight adults. Finding creative ways educate kids about exercise and healthy food choices is a top priority for School Health.

School Health Services 2009/2010

479 - Individual Health Care Plans

8,264 - Nursing Assessments & Health Counseling Services

1,461 - Case Management hours for acute & chronic health conditions

292 - Health Education classes

Thank you!

The School Health Program is funded by the Martin County Health Department, Martin County School District, Martin County, and the Children Services Council of Martin County. We would like to thank the above for their continued support of the School Health Program and the students of Martin County.
